Installation Guide for Fisery_RangerForSmartSourceElite.pdf	0	10/4/2021 10:15:16 PM	33	*

8. Click Save

Note: Save the installation executable (.exe) to either the C:/ drive or the Desktop.

Installation Information

The application will verify that the user is an Admin. If the user is not an Admin, the install button will show Non-Admin Install and warn that all components may not fully install. If the user is an Admin, only the Install option will be visible.

Note: There is a high chance the installation will fail if the user attempting the install is not an Admin. Fiserv suggests the install only be performed by an Administrator

Installation will not begin until the user clicks the Install/Non-Admin Install button. Once installation begins, it will check for any previously installed Ranger scanner drivers.

- If prompted, click Yes and the application will attempt to delete the previous driver. Once the uninstallation is complete, the installation will start automatically.
- If no Ranger drivers are found, the installation will start immediately.

If installation contains Silver Bullet Ranger scanner drivers, they will be installed.

• Any setting files needed for specific scanner models will be copied over.

Once complete, the user may be prompted to restart the computer. The workstation should be restarted before using the Source Capture system.

Installation

Important: The installation should be saved to the C: drive or desktop. Do not run the application from the FTP site.

To run the application:

1. Double click the file icon, or

2. Right click the icon and select Run as administrator

- 3. The application will verify if the user is an administrator
 - a. If the user is not an admin, a window will appear for the administrator to enter their admin credentials
- b. If the user is an admin, the button will read Install
